

Partial Revision of Eco Mark Product Category No.118 “Plastic Products Version 2.0”

Regarding to the Eco Mark Product Category No.118 “Plastic Products Version 2.0” (Established: September 1, 2005), the following minor revisions are made to make the Certification Criteria more clear. (The underlined text is added.)

3. Terminology

Reused part: Part to be reused, retrieved from used products without processing and appropriately treated such as cleansing/grinding, etc.

4. Certification Criteria

4-1. Environmental criteria

4-1-1. Material criteria

(2) For auto recycling products, 90% and more plastic part of used products to be collected should be recycled as material (including reused part). Regarding to the standard ratio of recycled plastic materials in the auto recycling products shall be used 20% and more (see Attachment 1). (For recycled plastic materials which are not produced from the auto recycling products, there is no limitation for use, but it is not permitted to add the weight percentage of recycled materials.)

Revised: November 4, 2005 (Revised to No.118 “Plastic Products Version 2.1”)
